# worksheet crafter

**Create great teaching worksheets. In minutes!**

Start from scratch with clip art, text, graphs and more

Or use numerous math templates designed by teachers

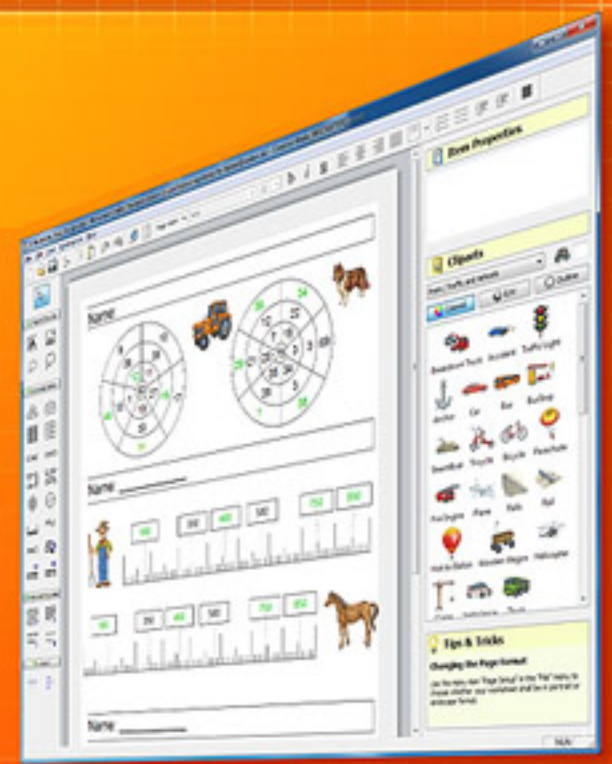

Like using Microsoft Word, only much easier and faster

**Differentiate your designs!**

2000+ free and professionally designed clip art images

Add speech bubbles, graphs, lines and more

Tweak pre-designed templates with a built-in smart exercise generator

Share templates in the online marketplace

Use templates created by teachers around the world

Export worksheets to Microsoft Word

**Share with teachers everywhere.**

Continual software updates delivered to you

Includes full documentation

All questions answered promptly

**Great support when you need it.**

The integrated marketplace for worksheets is a big hit.

For me, this is the ideal base for worksheets.

It's really incredibly time saving.

Awesome and unrivalled.

Unbeatable and absolutely recommendable.

A must for teachers.

Super solution!

I can only recommend anyone to get a copy of it.

The most useful tool I'm working with!

## THE **schoolcraft** STORY

A few years ago, some of the teachers in our family told us that there was no easy way to create worksheets, exercise materials and class tests that were individualized for their elementary school classrooms. It was hard to believe; but after a little research, we discovered just how few options there were.

We set out to change that.

We started modestly, creating a software program only for our family. Today, over 2,000 teachers across a handful of countries are using Worksheet Crafter. And just as importantly, tens of thousands of elementary school students are benefiting from lesson plans tailored to their individual needs.

Our mission is to bring that same benefit to teachers and students around the world. We suppose it's a lofty goal, but to us, it's a goal worth striving for.
